

FINALLY, A DUMP TRUCK
THAT'S ALREADY ALL READY.

Naturally, any time you can get everything you need in one simple, complete, ready-for-use package – it's a good thing.

That's the thinking behind the International® Integrated Dump truck. It's engineered and packaged as one complete unit – including chassis, dump body, hydraulic components and controls – for longer life,

improved reliability, higher performance and greater value.

Available with International® 7000 Series and 5000i Series chassis, International Integrated Dump trucks are taking the construction business to a new level of ease and productivity.

A COMPLETE TRUCK READY TO WORK. NO ASSEMBLY REQUIRED.

Total solution. Single source.

- Instead of buying the chassis and body from separate dealers, you can order a work-ready, fully integrated dump truck from International.
- Chassis, body and other components are engineered as a single unit for higher performance, reliability, durability and value. This also increases production efficiency by simplifying body mounting, so you can take quicker delivery.
- Your local International® dealer provides single-source parts and service support on chassis, body, hoist and lift axle for increased uptime and profits for your business.
- Innovative finance, lease and insurance programs are available from International Finance Group.
- Comprehensive warranties on the total truck – including body and dump components – are all administered by your local International dealer.
 - ▶ Three-year parts and labor warranty on body, dump body components, tarp arm and lift axles.*
 - ▶ Extended five-year limited warranties from Cummins and Hendrickson.*
 - ▶ International can also provide a custom warranty, which gives you the flexibility to design a protection plan to match your own unique operating environment and requirements.*

*All warranties are limited –
See your International dealer for details.

A range of body options.

- Aluminum and steel dump bodies available with lengths from 10' (3 m) to 19.5' (6 m).
- 13,200-lb (5,987 kg) capacity steerable and 20,000-lb (9,072 kg) capacity rigid lift axles are available to meet legal load requirements for your state.
- Standard hoist and PTO system are available through the International parts program.
- With the optional air-operated tailgate, the driver can unlatch the tailgate without leaving the cab – for enhanced productivity and less fatigue.
- Optional heated and insulated body makes it easier to load and unload in extremely cold conditions.
- Choose from six standard colors or order custom paint to help your business project a high-quality image (steel bodies only).

International® Integrated Dump Truck Specifications

International® 7000 Series dump trucks.

- 107" BBC (272 cm) International 7000 Series dump trucks offer outstanding durability, reliability, powertrain performance and maneuverability plus a refined driver environment.
- The on/off-highway frame system delivers unparalleled strength and durability, resists corrosion and is lighter than double-rail systems. The result: bigger payloads, yielding more profits on every trip.
- For applications requiring front-mounted equipment, a 32" (81 cm) set-forward front axle position is available.
- For applications that demand increased front axle loading, a 40" (102 cm) set-back front axle position is available.
- Factory-built, set-forward all-wheel-drive axle configurations are also available.
- Wide-track front axles provide up to a 50° wheel cut for outstanding maneuverability.
- The industry's most comfortable and spacious cab measures 72.5" (184 cm) wide and 58" (147 cm) floor to ceiling to offer more shoulder room, headroom and belly room.
- The International® Diamond Logic® electrical system simplifies troubleshooting and enhances diagnostics for increased uptime.
- Front axles up to 20,000 lb (9,072 kg); rear axles up to 52,000 lb (23,587 kg).
- International® I-6 engines deliver 210-355 hp (157-265 kW) and 520-1250 lb-ft (705-1695 N·m) of torque without adding unneeded weight. Engines from Caterpillar and Cummins with up to 430 hp are also available.

International® 5000i Series dump trucks.

- 114" (290 cm) BBC International® 5600i with 52" (132 cm) BA for outstanding set-back front axle loading and maneuverability.
- 114" (290 cm) BBC International® 5500i with set-forward axle and 28" (71 cm) BA for maximum Bridge Formula payload.
- 120" (305 cm) BBC International® 5900i set-forward axle with 30" (76 cm) BA and classic good looks.
- 12.25" (31.12 cm) standard frame-rail system has one of the industry's best strength-to-weight ratios.
- All-aluminum cab insulated for superior temperature control and noise reduction.
- Front axles up to 22,000 lb (9,979 kg); tandem rear axles up to 70,000 lb (31,751 kg).
- International engines with ratings up to 355 hp (265 kW) and 1250 lb-ft (1695 N·m) of torque. Other leading engines from Caterpillar and Cummins with up to 565 hp (421 kW).
